EXPERIENCE

BETTERMENT

Software Engineer | New York City

- July 2016 - Present*
 - Currently developing full-stack web features for Betterment's 401(k) product, [Betterment for Business \(B4B\)](#), in a ten person product squad
 - Managed B4B's summer engineering intern and helped him plan his project to refactor payroll notifications, provided technical mentorship and hosted weekly 1-on-1 meetings
 - One of 16 engineers that is approved for and provides Ruby platform reviews on pull-requests for our various Ruby on Rails applications

KITCHENSURFING

Software Engineer | New York City

- September 2015 - May 2016**
**ceased operations*
 - Worked as a full-stack engineer in a ten person product team to re-launch Kitchensurfing as a weekly subscription dinner service
 - Built customer-facing features, internal tools, and API endpoints for our iOS client in a Ruby on Rails web application with 97.63% test coverage
 - Example work: coordinated migration of user data from our legacy Mongo database to PostgreSQL with only eight minutes of controlled downtime, pair-programmed on starter-pack dinner bundle that increased customer retention by 30% over a six week period

GENERAL ASSEMBLY (GA)

Software Engineer | New York City

- February 2013 - August 2015*
 - Led full-stack web development in a four person product team on [GA Profiles](#), a Rails and React web platform for GA alumni and employers
 - Iterated on GA Profiles to grow it's user base to 1800+ student and 1500+ employer profiles in over a year, 60% of conversations started on GA Profiles resulted in second round interviews
 - Also taught intro to web development workshops and was an expert in residence for the part-time back-end web development course

EDUCATION

GEORGETOWN UNIVERSITY

B.A. Economics, Minor in Film & Media Studies | Washington, D.C.

- August 2010 - May 2012*
 - GPA 3.873 / 4.00, graduated magna cum laude
 - Produced a senior documentary thesis titled *So Where's Home?*

- Web Product Development
- Voice User Interface (VUI) Design
- Internet of Things
- Data Science
- Filmmaking
- Emerging Markets
- English Football

FUN FACTS

- Three classmates and I won OpenShift's sponsor prize at the 2013 Fintech Hackathon NYC for our Rails app, Social Fund
- I was born in Florida, raised by Filipino parents, and lived in Singapore for 16 years
- I cycled with a group of four from Kunming, China to Hanoi, Vietnam to raise money for rural schools in China and Sierra Leone
- I analyzed the relationship between NYC sanitation grades and Foursquare restaurant reviews for a [data science project](#)
- I ate a yak burger in Lhasa, Tibet
